

PRODUCT RANGE

Enameled aluminum flat wire

Conductor	Aluminum
Model	PEW/155
Heat resistance grade (°C)	155 (F grade)
Size diameter (mm)	a:0.90-5.60 b:3.15*16
Impact temperature	≥155°C
Insulation thickness	twice or as per your requirement
Packaging	plastic reel + carton + pallet/PT60/90/200 or wooden spool and customized
Payment method	L/C, T/T
Samples	Free samples are available (100-150cm free)

In many applications, such as low current, signal transmission and control circuits, the conductive properties of aluminum flat wire are sufficient to meet the needs, and it can maintain good electrical insulation properties and mechanical strength within a certain temperature range.
