

PRODUCT RANGE

Enameled Aluminum Wire

Conductor	Aluminum
Model	EIW180
Heat resistance grade (°C)	200°C (Class H)
Conductor diameter	±0.010mm
Size diameter (mm)	0.15 ~ 3.0
Resistivity	≤0.017241Ω·mm ² /m
Thermal shock temperature	≥180°C
Packaging	Wooden pallet or wooden box/PT4-PT200 or plywood spool
Payment terms	L/C, T/T, MoneyGram
Sample	Free sample available (100-150cm free)

The surface of the enameled aluminum wire is covered with a layer of insulating enameled. This insulation layer can effectively prevent leakage and short circuits, improving the safety of electrical equipment. The enameled aluminum wire is more resistant to corrosion from humidity, oxidation and chemical substances.
