

Polyesterimide Enameled Round Aluminum Wire

Table1 Specifications

Product Model	AIW/QZY 180
Specification	Range Diameter(mm): 0.31-3.00
Standards	IEC; ISO 9000; ISO 9001; IATF 16949
Product Characteristics	High temperature resistance, light weight and good electrical insulation properties.

Enameled aluminum wire offers a combination of good electrical conductivity, excellent insulation, corrosion resistance, flexibility, light weight, and cost-effectiveness, making it an affordable choice, especially for applications that make heavy use of conductors.
